Exo 4

1) Si A, BE Mn(TR) alovs det AB = de+A de+B

A inversible (>> det A +0

Binversible (>> det B +0

A, Binversible => detA +0 => det AB = detA detB +0
detB +0

$$(AB)^{-1} = B^{-1}A^{-1} cov \qquad (B^{-1}A^{-1}) AB = B^{-1}(A^{-1}A)B$$

$$= B^{-1} I_{\eta} B$$

$$= B^{-1} B$$

$$= I_{\eta}$$

de même AB(B'A') = In

2/
$$\forall A,B \in M_n(R)$$

on a que ${}^{\dagger}(AB) = {}^{\dagger}B^{\dagger}A \Rightarrow T_n = {}^{\dagger}T_n = {}^{\dagger}(AA^{-1}) = {}^{\dagger}(A^{-1})^{\dagger}A$
 $\Rightarrow ({}^{\dagger}A)^{-1} = {}^{\dagger}(A^{-1})$

Ex05/

1/ det M = 8
=
$$-(\sqrt{3}-1)(\sqrt{3}+1) 2 + (2\sqrt{3})^2$$

= $-2(3-1) + 4 \times 3 = 12-4$

21
$$M^3 = 8 I_n$$
 a venfer

3/
$$M^3 = 8I_n \Rightarrow M M^2 = 8I_n$$

 $\Rightarrow M(\frac{1}{8}M^2) = I_n$
 $\Rightarrow M^{-1} = \frac{1}{8}M^2$

elet
$$\begin{pmatrix} 2 & 3 & 6 \\ 4 & -1 & 1 \\ 6 & 2 & 7 \end{pmatrix} = 0 \Rightarrow pas inversible $\begin{pmatrix} 1 \\ 1 \\ -1 \end{pmatrix}$ f ker$$
